**ACADEMIC PREPARATION**

Academic preparation for dental school requires a Bachelor’s degree (usually) and completion of a set of prerequisite classes, usually science, which vary from school to school. The most common classes are outlined on the final page of this Summary. For your degree, any major is appropriate. There is no preference in this regard, so study something you love!

**EXTRACURRICULAR ACTIVITIES**

Preparation for dental school involves engaging in experiences that develop and demonstrate skills in communication, leadership, community service, research, and familiarity with the dental profession. What you do outside of class is as important as what you do in class so don’t neglect these activities. Keep in mind that activities complement your coursework, but will not compensate for low grades. Both are important!

---

**Community Service**

Because you are preparing for a humanitarian profession, it is important to have volunteer experiences which demonstrate a commitment to service to others. This be ongoing throughout your college years, not done for a time then discontinued.

- Lowell Bennion Community Service Center
  (http://www.bennioncenter.org)

**Research Experience**

More and more dental schools recommend students to have research experiences because dentists depend on research literature in dentistry to remain current in the field throughout their entire careers. Your research experience does not have to be medically related or in a lab. It can be in any discipline as long as it is with a professor or other researcher and is **hypothesis-based research using the scientific method**.

- Undergraduate Research Opportunities Program (UROP)
  (http://our.utah.edu/)
- My Undergraduate Signature Experience (MUSE)
  (http://muse.utah.edu/)

**Shadowing Dentists & Dental Experience**

Dental experience is very important. It should be one of your first experiences. Observing a dentist in action will help you gather the information you need to fully commit to the profession and learn about a variety of dental specialties.

**Competitive applicants complete 100-200 hours of shadowing and dental experience combined.**

Most students gain this experience by shadowing a general dentist for more than a semester. Consider taking **BIOL 3080**, Dental School Science and Lab Preparation, and **4080**, Dental Observation to structure your experience and earn course credit.

**Leadership Experience**

As a dentist, you will be a leader and team member in many ways – with your patients, your staff, your colleagues, and in your community. Examples includes offices held in organizations, committee work; leadership in church activities; coordinating a project; managing, training, supervising at work or in other activities; teaching experience of any kind; peer counseling or mentoring, etc.

  (http://www.asuu.utah.edu)

---

**Things to Remember**

- Keep contact information for supervisors and dentists you shadow or work with in case you need recommendation letters. Even if you discontinue an activity, try to maintain a relationship with your supervisor.
- Record all hours of service and experiences. Writing reflections on what you learned in a journal will help when you write your personal statement for your application. You can download the **PreHealth Planner Spread Sheet** from our website; you will find it under Available Downloads.
- Dental schools from across the country visit the U of U campus in Fall semester. They usually give information sessions and sometimes meet with students individually. We strongly recommend our students to participate in these sessions.

THE DAT

Take the DAT (Dental Admissions Test) when you have finished the necessary coursework. The DAT is administered throughout the year at local testing centers. For DAT registration, visit http://www.ada.org/dat.aspx.

The DAT is scored on a 1-30 scale and is divided into four areas: Natural Sciences, Reading Comprehension, Quantitative Ability, and Perceptual Ability. It should be taken 18 months prior to the dental school class you plan to enter. It is to your advantage to take it early, by April-June in the year you are submitting your application.

APPLICATION PROCESS

Your application process begins in spring or summer at the end of your junior year or once you have completed the necessary requirements. Dental schools admit students once a year for fall only. You’ll submit your application one year in advance of the year for which you wish to begin dental school.

AADSAS

There are 66 accredited dental schools in the United States, and all of them receive applications via the American Association of Dental Schools Application Service (AADSAS) http://www.adea.org/. AADSAS is a standard application that is forwarded to the schools you choose.

Your application includes demographic information, a list of all college course you have taken, a list of all your activities, and a personal statement explaining why you want to be a dentist.

After submission of the AADSAS application, supplemental material, such as letters of recommendation, will usually be required.

Most dental schools also require a personal interview. Please consult the preprofessional advisors regularly as you prepare your application.
• LETTERS OF RECOMMENDATION

You will submit your letters to AADSAS who will then distribute them to the dental schools. You can submit up to 4 letters. The following are what is usually required, but may vary by school. Research schools early to find out what they require.

1. Science Professor
2. Science / non-Science Professor
3. Dentist
4. Dentist / Supervisor

What you need to do
1) Contact professors and dentists to see if they are interested in writing a recommendation letter for you.
2) If they agree, get their e-mail address which they use most frequently.
3) List their e-mail addresses on the application form online under “Evaluators” section.
4) As soon as you post letter writers’ names and e-mail addresses, AADSAS will send an e-mail to them. It is important to let your letter writers know they will be receiving e-mail from AADSAS. Ask them to check their junk mail box regularly.

What your letter writers need to do
1) They will receive an email from AADSAS that will direct them to the AADSAS Evaluators portal.
2) They will be asked to provide their contact information. They only need to do this once, even if they evaluate multiple students.
3) They will post their recommendation letters through the portal. Step by step instruction are available to assist them.

❖ PREDENTAL GENERAL POLICIES REGARDING COURSEWORK

<table>
<thead>
<tr>
<th>CLEP Credit &amp; Correspondence Study</th>
<th>Not acceptable as part of the predental curriculum.</th>
</tr>
</thead>
<tbody>
<tr>
<td>AP Credits</td>
<td>Dental schools take AP credits, but it is recommended to take coursework beyond introductory classes waived by AP.</td>
</tr>
<tr>
<td>“Online” Classes</td>
<td>Online sections of semester based university classes or online/in-person hybrid sections of semester based classes will usually be accepted. Online classes which are not university semester based (independent study) will generally not be accepted.</td>
</tr>
<tr>
<td>2 year colleges credits</td>
<td>Many schools limit credits taken at 2 year colleges to 60 credit hours</td>
</tr>
<tr>
<td>Repeats</td>
<td>All repeats are counted in your AADSAS GPA</td>
</tr>
<tr>
<td>Withdrawals</td>
<td>W’s should normally be used only for emergencies, although they will not affect your GPA</td>
</tr>
<tr>
<td>GPA</td>
<td>Generally the minimum GPA is around 3.0, but varies by schools and may be higher or lower. The average GPA for accepted applicants across all schools is 3.6 Total GPA and 3.5 for Science GPA UUSD—No minimum GPA. Average GPA for accepted students: 3.74 Total, 3.66 Science Roseman University—Minimum Science GPA: 3.0 in last 30 science credits, Average Total GPA for Accepted Applications: 3.40</td>
</tr>

PreDental Science Course Guide

This guide is designed for students preparing for a range of dental schools. It is not a comprehensive list. Requirements may vary by school. Shading indicates most commonly required by dental schools. (Classes with * may be taken @ SLCC. However, not all dental schools accept prerequisites from 2 year schools)

</tbody>
</table>

**OPTIONAL preparatory courses for CHEM, MATH, and PHYS:**
- MATH 990+1010
- MATH 10 Math Boot Camp for Intermediate Algebra
- MATH 15 Math Boot Camp for Pre-Calculus
- CHEM 10 Chemistry Boot Camp for General Chemistry
- CHEM 1200 (3) Prep for College Chemistry
- CHEM 1208 (1) Intro to Periodic Table
- CHEM 2308 (1) Intro to O-Chem
- PHYS 1500 (3) Prep for College Physics

**NOTE:** In order to take math classes, you must have the required ACT, SAT or math placement test scores, or successfully pass the prerequisite math class.

**2 Biology LABs:** Either the Anatomy OR Physiology lab will fulfill the first biology lab for most schools. The second biology lab can be fulfilled by any biology lab such as BIOL 2015, 3115, 3205, 3235, 3515, 3525 or others. Please note that some of the labs listed require a corresponding class. Labs at SLCC may also be acceptable.
