ACADEMIC PREPARATION

Academic preparation for medical school requires a Bachelor’s degree and completion of a set of prerequisite classes, usually science, which vary from school to school. The most common classes are outlined on the final page of this Summary. For your degree, any major is appropriate. There is no preference in this regard, so study something you love!

EXTRACURRICULAR ACTIVITIES

Preparation for medical school involves engaging in experiences that develop and demonstrate skills in communication, leadership, community service, research, and familiarity with the medical profession. What you do outside of class is as important as what you do in class so don’t neglect these activities. Keep in mind that activities complement your coursework, but will not compensate for low grades. Both are important!

Things to Remember

- Make sure you have contact information for supervisors and physicians you work with or shadow in case you need a recommendation letter. Try to keep an open relationship with them after you discontinue activities.
- Keep a record of all hours of service and experiences. The Premed Planner Spread Sheet on our website can help with this. You will find it under Available Downloads.
- Writing reflections on each activity in a journal will be helpful when you write your personal statement.
THE MCAT

- The MCAT is administered in January, and March through September.

- Taking the exam by spring will enable you to apply earlier. September is the last MCAT accepted by many schools for the following Fall entering class.

- The MCAT is divided into four multiple choice sections: Biological and Biochemical Foundations of Living Systems, Chemical and Physical Foundations of Living Systems, Psychological, Social and Biological Foundations of Behavior, and Critical Analysis and Reasoning Skills. You can obtain the most updated information from [https://www.aamc.org/students/applying/mcat/mcat2015/](https://www.aamc.org/students/applying/mcat/mcat2015/).

THE APPLICATION PROCESS

- US medical schools admit students once a year in the Fall

- Applications are submitted 12-15 months before your desired medical school enrollment date. This means the application process can begin as early as the spring after your Junior year. However, the timing depends on when you will complete your degree and the necessary premedical coursework (and successfully take the MCAT). All degrees must be posted to your transcript prior to starting medical school, and the timing is sensitive.

- While applying early in the cycle has advantages, the best time for you to apply is when your application is the best it can be.

- You can apply to both M.D. and D.O. schools! In fact, we encourage students to consider doing so.

- Medical schools requirements vary from school to school. Research schools early for specific information about requirements.

- There are three centralized application services processing primary applications for US medical schools: AMCAS for MD schools, AACOMAS for DO schools, and TMDSAS for schools in the University of Texas system. These services are very similar, but not identical. They open online in early May each year to allow applicants to start building applications, and begin accepting submissions on or around June 1st. Refer to the chart on page 3 for additional information.

- There are a handful of private schools not affiliated with any of these centralized services and require other applications. Information is available on each school’s website.

- Before submitting applications, have people with an unbiased eye go over each entire application to catch any errors.

- To help us advise other students, we would appreciate it if you would release your statistical information from your applications to the Health Professions Advisor when prompted. This information will always be kept confidential.

*Total = Total GPA, BCPM = Biology, Chemistry, Physics, Math (Science) GPA, AO = All Other (Non-Science) GPA

**LETTERS OF RECOMMENDATION**

- Once a medical school receives your primary application through the application service, the school will request supplementary materials, including program specific secondary applications and Letters of Recommendation (LORs).
- Application services do not share letters: Be sure to plan ahead regarding where to have your letters sent.
  - Applicants who plan to apply only to AMCAS, ACOMAS, or TMDSAS affiliated medical schools most often take advantage of the Letter Service provided by those systems.
  - If applying to both MD and DO schools, or including TMDSAS schools, unaffiliated schools, or an international program, it is easiest to subscribe to a service like Interfolio ([interfolio.com/](interfolio.com/)) which allows you to collect all your letters in one place and have them sent to each application service.
- Do not delay submitting your primary application while waiting for letters to arrive. Letters are part of the secondary process.
- Requirements for letters vary between schools, so research schools early and know what you need. The following is based on the UUSOM’s requirements, and generally covers the types of letters you will need. Plan ahead! Get to know people from these categories so you will have a variety of people who can write excellent letters for you.
  1. **Science Professor** (BCPM)
  2. **Non-Science Professor OR 2nd Science Professor** (Requirements vary by school)
  3. **Mentor letter—Usually a Supervisor for Research, Patient Exposure, Community Service, or Employment**

**PREMED GENERAL POLICIES REGARDING COURSEWORK**

<table>
<thead>
<tr>
<th>CLEP Credit &amp; Correspondence Study</th>
<th>Not acceptable as part of the premed curriculum</th>
</tr>
</thead>
<tbody>
<tr>
<td>AP Credits</td>
<td>Generally, students must take coursework beyond introductory classes waived by AP</td>
</tr>
<tr>
<td>“Online” Courses</td>
<td>Online sections of semester based university classes, or online/in person hybrid sections of semester based classes will usually be accepted. <em>Online courses which are not university semester based (independent study) will generally not be accepted.</em></td>
</tr>
<tr>
<td>Repeat Policy</td>
<td>All grades for repeated courses will be counted towards your GPA on your medical school application through AMCAS, ACOMAS, and/or TMDSAS</td>
</tr>
<tr>
<td>Withdrawals</td>
<td>W’s should be used only for emergencies, although W’s will not affect your GPA.</td>
</tr>
<tr>
<td>GPA</td>
<td>Generally the minimum GPA for Total, Science, and AO is 3.0, but may be higher or lower depending on the school. The average GPA for accepted applicants is usually in the 3.6 range for MD schools and 3.5 range for DO schools. UUSOM recommended minimum is 3.2, and average is around 3.6.</td>
</tr>

## Premedical Course Guide

This guide is designed for applying to a range of medical schools. It is not a comprehensive list. Requirements may vary by school. Shading indicates the classes most commonly required by medical schools. See a PPA advisor for more information.

[Classes with * may be taken at a Community College. However, not all medical schools accept prerequisites from 2 year schools]

(Prereq MATH 1210)  
May be required by a few schools. | 2210 (4) for Scientists & Engineers 1  
2015 (1) Lab  
(Prereq: MATH 1210) | | | | |
| 2220 (4) Calculus III  
(Prereq: MATH 1220)  
May be required by a few schools. | 2220 (4) for Scientists & Engineers 2  
2025 (1) Lab  
(Prereq: PHYS 2210 & MATH 1220) | | | | |
| 2020 (4) Gen. Physics 2  
2025 (1) Lab  
(Prereq: PHYS 2010) | | | | |
| | | | | |
| *1220 (4) Gen Chem 2  
1225 (1) Lab  
(Prereq CHEM 1210)  
[NOT waived by AP Chemistry] | | | | |
| | | | | |
| 1070 (3) Statistics  
(Prereq: B or higher in MATH 0980, B or higher in MATH 1010 or 1030)  
Recommended by many med schools.  
Can be substituted with PSY 3000, FCS 3210, or other statistics course. | | | | |
| | | | | |
| *2420 (4) Human Physiology  
(Prereq: BIOL 1610 & CHEM 1210)  
MCAT prep | | | | |
| | | | | |
| 2210 (3) Biochem I  
(Prereq: CHEM 2310)  
CHEM 2320 & BIOL 2020 recom.  
MCAT prep | | | | |
| | | | | |
| 2 Biology Labs: Most Medical schools require two Biology labs. Either the Anatomy OR Physiology lab can count for 1 lab at most schools. The 2nd lab can be fulfilled by other biology labs such as BIOL 1615, 1625, 3115, 3205, 3235, 3515, 3525 or others. Please note that some of these labs require the corresponding course. Labs at SLCC may also be acceptable. | | | | |

### OPTIONAL exploration courses:

- **UGS 1020 (1):** Introduction to PreMed/PrePA
- **H EDU 2010 (3):** Introduction to Health Professions
- **LEAP 1100+1101 (3+3):** Health Professions LEAP
- **FCS 1500 (BF):** Lifespan Hum. Development
- **FCS 3290 (HFDV):** Ethnic Minority Families
- **PSY 3040 (DV):** Psychology of Gender
- **SOC 3650 (IRQBQI):** Population & Society
- **SOC 3673 (QBQI):** Social Epidemiology
- **ECON 3190 Intro to Health Economics
- **ANTH 1010 (BF):** Culture & the Hum. Exp.
- **FCS 3380: Social Science & Health Care Co-designed with the School of Medicine

---

**Note:** In order to take a math class, you must have the required ACT, SAT or math placement test scores, or have successfully passed the prerequisite math class.
