How to Add Additional Classes

Adding classes to your plan for a second major, minor, or any additional classes not found in the roadmap

#1: Open up your plan and corresponding roadmap. Begin by clicking and dragging the class from the roadmap (on the left in the picture above) and dropping it into the semester you desire to take the course in your plan (on the right in the picture above). Continue in this way until all of the classes from the roadmap are listed in your plan.

#2: You are able to easily add classes not found in your roadmap. Begin by right clicking on the semester in which you want to take the class. A drop box will appear (shown in the picture above). Click on “Add Course.”
#3: Type in the class you want to add to your plan. Make sure that you use the exact department abbreviation and course number. If you need to look up the abbreviation and course number, you can access the class schedule by clicking "Catalog and Class Schedule" at www.utah.edu on the University home page.

#4: Use the right click and "add class" method to add classes for a second major, minor, or any additional classes you want to take.
